About Us & Solar Benefits

Our Story, Credentials & Your Personalized Savings

SHREE ADISHAKTI SOLAR PVT LTD

Shree Adishakti Solar Pvt Ltd is a premier solar energy solutions company headquartered in Bhubaneswar, Odisha. As a trusted name in the renewable energy sector, we specialize in design, supply, installation, and commissioning of rooftop solar PV systems for residential, commercial, and industrial clients. Our mission is to accelerate Odisha's transition to clean energy by making solar power accessible, affordable, and reliable.

TATA Power Partner

Authorized Channel Partner of TATA Power for TPCODL, NODL, SODL & WODL DISCOMs across Odisha.

PM Surya Ghar Yojana

Authorized installer under Pradhan Mantri Surya Ghar Muft Bijli Yojana for residential solar installations.

Professional Excellence

Delivering world-class solar solutions with certified engineers and quality after-sales support.

Green Energy Mission

Committed to making Odisha energy-independent through clean, affordable, and reliable solar power.

Warranty, AMC & Work Execution Plan

Our Service Commitment & Project Timeline

	Component	Warranty Type	Duration	Coverage
☀️	**Solar PV Modules**	Performance Warranty	25 Years	Min 80% output at 25 years
⚡	**Solar Inverter**	Product Warranty	7 Years	Full replacement by manufacturer
🛠️	**Mounting Structure**	Structural Warranty	5 Years	Against rust, corrosion & failure
🔧	**Installation Work**	Workmanship Warranty	5 Years	Against installation defects
📋	**AMC Services**	Annual Maintenance Contract	5 Years	Comprehensive maintenance included

AMC SERVICES INCLUDED

- ✓ Quarterly on-site inspection and performance check
- ✓ Solar panel cleaning (2 times per year)
- ✓ Inverter diagnostics and firmware updates
- ✓ DC/AC cable and connection integrity check
- ✓ Earthing and lightning protection system check
- ✓ Generation report and savings statement
- ✓ Priority customer support (response within 48 hours)
- ✓ Minor repairs and replacement of minor components

SYSTEM LIFE EXPECTANCY

25+

Years

WARRANTY CLAIM PROCESS

Contact support with issue description
Site inspection within 48 working hours
Diagnosis & resolution within 7 days
Component replacement under warranty

WORK EXECUTION PLAN — PROJECT TIMELINE

1 Site Survey & Assessment — Day 1-2
Structural assessment, roof measurement, shadow analysis, load evaluation, DISCOM feasibility check.

2 System Design & Engineering — Day 3-5
SLD, structural drawing, panel layout, BOM preparation.

3 Material Procurement — Day 6-15
Ordering panels, inverter, structure, cables, BOS from approved vendors.

4 Civil & Structural Work — Day 16-18
Roof preparation, cable routing, earthing pit, lightning arrester installation.

5 Solar Panel Installation — Day 19-21
Mounting structure erection, panel fixing, DC cable routing & MC4 connectors.

6 Electrical Work & Wiring — Day 22-24
Inverter installation, AC cable routing, DB board, earthing, SPD.

7 System Testing & Commissioning — Day 25-26
OCV test, insulation test, polarity check, inverter config, performance verification.

8 Net Metering Application — Day 27-35
DISCOM application, inspection, bidirectional meter installation.

9 PM Surya Ghar Registration — Day 28-45
Portal registration, document submission, subsidy disbursement processing.

10 Handover & Customer Training — Day 45
System handover, monitoring app setup, warranty docs, AMC signing.

Total project completion: Approximately 45-60 days (subject to DISCOM & government processing)

45-60
Days
